Question

The graph of the exponential function f is shown, where $y = f(x)$. The y -intercept of the graph is $(0, y)$. What is the value of y ?

Correct Answer: 3

Rationale

The correct answer is **3**. For the graph of the exponential function f shown, where $y = f(x)$, it's given that the y -intercept of the graph is $(0, y)$. The graph intersects the y -axis at the point $(0, 3)$. Therefore, the value of y is **3**.
