Question

A certain college had 3,000 students enrolled in 2015. The college predicts that after 2015, the number of students enrolled each year will be 2% less than the number of students enrolled the year before. Which of the following functions models the relationship between the number of students enrolled, $f(x)$, and the number of years after 2015, x ?

Answer

A. $f(x) = 0.02(3,000)^x$

B. $f(x) = 0.98(3,000)^x$

C. $f(x) = 3,000(0.02)^x$

D. $f(x) = 3,000(0.98)^x$
