

Question ID: e1f9000d

Question

$$h(t) = -16t^2 + b$$

The function h estimates an object's height, in feet, above the ground t seconds after the object is dropped, where b is a constant. The function estimates that the object is **3,364** feet above the ground when it is dropped at $t = 0$. Approximately how many seconds after being dropped does the function estimate the object will hit the ground?

Answer

- A. **7.25**
- B. **14.50**
- C. **105.13**
- D. **210.25**
