Question

If $\frac{x}{8} = 5$, what is the value of $\frac{8}{x}$?

Correct Answer: .2, 1/5

Rationale

The correct answer is $\frac{1}{5}$. Since the number **5** can also be written as $\frac{5}{1}$, the given equation can also be written as $\frac{x}{8} = \frac{5}{1}$. This equation is equivalent to $\frac{8}{x} = \frac{1}{5}$. Therefore, the value of $\frac{8}{x}$ is $\frac{1}{5}$. Note that 1/5 and .2 are examples of ways to enter a correct answer.

Alternate approach: Multiplying both sides of the equation $\frac{x}{8} = 5$ by **8** yields $x = 40$. Substituting **40** for x into the expression $\frac{8}{x}$ yields $\frac{8}{40}$, or $\frac{1}{5}$.
