Question

One pound of grapes costs \$2. At this rate, how many dollars will c pounds of grapes cost?

Answer

- A. $2c$
- B. $2 + c$
- C. $\frac{2}{c}$
- D. $\frac{c}{2}$

Correct Answer: A

Rationale

Choice A is correct. If one pound of grapes costs \$2, two pounds of grapes will cost 2 times \$2, three pounds of grapes will cost 3 times \$2, and so on. Therefore, c pounds of grapes will cost c times \$2, which is 2c dollars.

Choice B is incorrect and may result from incorrectly adding instead of multiplying. Choice C is incorrect and may result from assuming that c pounds cost \$2, and then finding the cost per pound. Choice D is incorrect and could result from incorrectly assuming that 2 pounds cost \$c, and then finding the cost per pound.
