Question

Henry receives a **\$60.00** gift card to pay for movies online. He uses his gift card to buy **3** movies for **\$7.50** each. If he spends the rest of his gift card balance on renting movies for **\$1.50** each, how many movies can Henry rent?

Answer

- A. 10
- B. 25
- C. 35
- D. 40

Correct Answer: B

Rationale

Choice B is correct. It's given that Henry uses his **\$60.00** gift card to buy **3** movies for **\$7.50** each. Therefore, Henry spends **3(\$7.50)**, or **\$22.50**, of his **\$60.00** gift card to buy **3** movies. After buying **3** movies with his **\$60.00** gift card, Henry has a gift card balance of **\$60.00 — \$22.50**, or **\$37.50**. It's also given that Henry spends the rest of his gift card balance on renting movies for **\$1.50** each. Therefore, Henry can rent $\frac{\textbf{\$37.50}}{\textbf{\$1.50}}$, or **25**, movies.

Choice A is incorrect and may result from conceptual or calculation errors.

Choice C is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect and may result from conceptual or calculation errors.
