Question

$8x - 7x + 130 = 260$

What value of x is the solution to the given equation?

Correct Answer: 130

Rationale

The correct answer is **130**. It's given that $8x - 7x + 130 = 260$. Combining like terms on the left-hand side of this equation yields $x + 130 = 260$. Subtracting **130** from each side of this equation yields $x = 130$. Therefore, the value of x that's the solution to the given equation is **130**.
