Question

$5(t + 3) - 7(t + 3) = 38$

What value of *t* is the solution to the given equation?

Correct Answer: -22

Rationale

The correct answer is **−22**. The given equation can be rewritten as **−2(*t* + 3) = 38**. Dividing both sides of this equation by **−2** yields ***t* + 3 = −19**. Subtracting **3** from both sides of this equation yields ***t* = −22**. Therefore, **−22** is the value of *t* that is the solution to the given equation.
