Question

The y-intercept of the graph of $12x + 2y = 18$ in the xy -plane is $(0, y)$. What is the value of y ?

Correct Answer: 9

Rationale

The correct answer is **9**. It's given that the y-intercept of the graph of $12x + 2y = 18$ in the xy -plane is $(0, y)$. Substituting **0** for x in the equation $12x + 2y = 18$ yields $12(0) + 2y = 18$, or $2y = 18$. Dividing both sides of this equation by **2** yields $y = 9$. Therefore, the value of y is **9**.
