Question

The number  $y$  is ~~84~~ less than the number  $x$ . Which equation represents the relationship between  $x$  and  $y$ ?

Answer

- A.  $y = x + 84$
- B.  $y = \frac{1}{84}x$
- C.  $y = 84x$
- D.  $y = x - 84$

Correct Answer: D

Rationale

Choice D is correct. It’s given that the number  $y$  is ~~84~~ less than the number  $x$ . A number that’s ~~84~~ less than the number  $x$  is equivalent to ~~84~~ subtracted from the number  $x$ , or  $x - \del{84}$ . Therefore, the equation  $y = x - \del{84}$  represents the relationship between  $x$  and  $y$ .

Choice A is incorrect and may result from conceptual errors.

Choice B is incorrect and may result from conceptual errors.

Choice C is incorrect and may result from conceptual errors.
