Question

Hydrogen is placed inside a container and kept at a constant pressure. The graph shows the estimated volume y , in liters, of the hydrogen when its temperature is x kelvins.

What is the estimated volume, in liters, of the hydrogen when its temperature is **500** kelvins?

Answer

- A. 0
- B. $\frac{7}{500}$
- C. 7
- D. $\frac{500}{7}$
