

Question ID: 53487897

Question

The relationship between two variables, x and y , is linear. For every increase in the value of x by 1 , the value of y increases by 8 . When the value of x is 2 , the value of y is 18 . Which equation represents this relationship?

Answer

A. $y = 2x + 18$

B. $y = 2x + 8$

C. $y = 8x + 2$

D. $y = 3x + 26$
