

Question ID: 6daf8d70

Question

A city employee will plant two types of bushes, azaleas and boxwoods, in a park. There will be no more than **164** total bushes planted, and the number of azaleas planted will be at most three times the number of boxwoods planted. Which of the following systems of inequalities best represents this situation, where ***a*** is the number of azaleas that will be planted, and ***b*** is the number of boxwoods that will be planted?

Answer

A. $a + b \geq 164$

$$3a \geq b$$

B. $a + b \geq 164$

$$a \leq 3b$$

C. $a + b \leq 164$

$$3a \geq b$$

D. $a + b \leq 164$

$$a \leq 3b$$
