Question

$x + y = 125$

$x + y + y = 155$

The solution to the given system of equations is (x, y) . What is the value of y ?

Correct Answer: 30

Rationale

The correct answer is 30. It's given that $x + y = 125$. Substituting 125 for $x + y$ in the second equation of the given system yields $125 + y = 155$. Subtracting 125 from both sides of this equation yields $y = 30$. Therefore, the value of y is 30.
