SAT	Math	Algebra	Systems of two linear equations in two variables	Easy

Question

$$y = -3x$$

$$4x + y = 15$$

The solution to the given system of equations is (x, y) . What is the value of x ?

Answer

- A. 1
- B. 5
- C. 15
- D. 45

Correct Answer: C

Rationale

Choice C is correct. The given system of linear equations can be solved by the substitution method. Substituting $-3x$ for y from the first equation in the given system into the second equation yields $4x + (-3x) = 15$, or $x = 15$.

Choice A is incorrect and may result from conceptual or calculation errors.

Choice B is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect. This is the absolute value of y , not the value of x .
