Question

$$y = 2x + 3$$
$$x = 1$$

What is the solution (x,y) to the given system of equations?

- Answer
- A. $(1,2)$
- B. $(1,5)$
- C. $(2,3)$
- D. $(2,7)$

Correct Answer: B

Rationale

Choice B is correct. Since it's given that $x = 1$, substituting 1 for x in the first equation yields $y = 2(1) + 3$. Simplifying the right-hand side of this equation yields $y = 2 + 3$, or $y = 5$. Therefore, the ordered pair $(1,5)$ is a solution to the given system of equations.

Choice A is incorrect and may result from a calculation error when substituting 1 for x in the first equation. Choices C and D are incorrect. Because it's given that $x = 1$, x cannot equal 2 as stated in these ordered pairs.
