Question

$$10x = 110$$

$$6x - 63 = y$$

The solution to the given system of equations is (x, y) . What is the value of y ?

Answer

- A. 63
- B. 11
- C. 10
- D. 3

Correct Answer: D

Rationale

Choice D is correct. Dividing both sides of the equation $10x = 110$ by 10 yields $x = 11$. Substituting 11 for x in the equation $6x - 63 = y$ yields $6(11) - 63 = y$, which is equivalent to $66 - 63 = y$, or $3 = y$. Therefore, the value of y is 3 .

Choice A is incorrect and may result from conceptual or calculation errors.

Choice B is incorrect. This is the value of x , not y .

Choice C is incorrect and may result from conceptual or calculation errors.
