Question

$y = 4$

$x = y + 6$

The solution to the given system of equations is (x, y) . What is the value of x ?

Answer

- A. 10
- B. 6
- C. 4
- D. 2

Correct Answer: A

Rationale

Choice A is correct. According to the first equation in the given system, $y = 4$. Substituting 4 for y in the second equation in the given system yields $x = 4 + 6$, or $x = 10$.

Choice B is incorrect and may result from conceptual or calculation errors.

Choice C is incorrect. This is the value of y , not x .

Choice D is incorrect and may result from conceptual or calculation errors.
