Question

$5y = 10x + 11$

$-5y = 5x - 21$

The solution to the given system of equations is (x, y) . What is the value of $30x$?

Correct Answer: 20

Rationale

The correct answer is **20**. Adding the first equation to the second equation in the given system yields $5y - 5y = 10x + 5x + 11 - 21$, or $0 = 15x - 10$. Adding **10** to both sides of this equation yields $10 = 15x$. Multiplying both sides of this equation by **2** yields $20 = 30x$. Therefore, the value of **30x** is **20**.
