Question

A rectangle has a length of **64** inches and a width of **32** inches. What is the area, in square inches, of the rectangle?

Correct Answer: 2048

Rationale

The correct answer is **2,048**. The area ***A***, in square inches, of a rectangle is equal to the product of its length ***ℓ***, in inches, and its width ***w***, in inches, or **$A = \ell w$** . It's given that the rectangle has a length of **64** inches and a width of **32** inches. Substituting **64** for ***ℓ*** and **32** for ***w*** in the equation **$A = \ell w$** yields **$A = (64)(32)$** , or **$A = 2,048$** . Therefore, the area, in square inches, of the rectangle is **2,048**.
