Question

What is the area, in square centimeters, of a rectangle with a length of **34 centimeters (cm)** and a width of **29 cm**?

Correct Answer: 986

Rationale

The correct answer is **986**. The area, ***A***, of a rectangle is given by  **$A = \ell w$** , where ***ℓ*** is the length of the rectangle and ***w*** is its width. It's given that the length of the rectangle is **34 centimeters (cm)** and the width is **29 cm**. Substituting **34** for ***ℓ*** and **29** for ***w*** in the equation  **$A = \ell w$**  yields  **$A = (34)(29)$** , or  **$A = 986$** . Therefore, the area, in square centimeters, of this rectangle is **986**.
