Question

A circle has center G , and points M and N lie on the circle. Line segments MH and NH are tangent to the circle at points M and N , respectively. If the radius of the circle is **168** millimeters and the perimeter of quadrilateral $GMHN$ is **3,856** millimeters, what is the distance, in millimeters, between points G and H ?

Answer

- A. **168**
- B. **1,752**
- C. **1,760**
- D. **1,768**
