Question

Note: Figure not drawn to scale.

In the figure shown, line *m* is parallel to line *n*. What is the value of *x*?

Answer

- A. 13
- B. 26
- C. 52
- D. 154

Correct Answer: D

Rationale

Choice D is correct. The sum of consecutive interior angles between two parallel lines and on the same side of the transversal is 180 degrees. Since it's given that line *m* is parallel to line *n*, it follows that  $x + 26 = 180$ . Subtracting 26 from both sides of this equation yields 154. Therefore, the value of *x* is 154.

Choice A is incorrect. This is half of the given angle measure.

Choice B is incorrect. This is the value of the given angle measure.

Choice C is incorrect. This is twice the value of the given angle measure.
