Question

The bar graph shows the distribution of the number of walnuts per container for **20** containers at a grocery store.

How many of these containers of walnuts contain exactly **78** walnuts?

Answer

- A. **2**
- B. **7**
- C. **20**
- D. **78**

Correct Answer: B

Rationale

Choice B is correct. The height of each bar in the graph shown represents the number of containers that contain the number of walnuts specified at the bottom of the bar. The bar for **78** walnuts has a height of **7**. Therefore, **7** of these containers of walnuts contain exactly **78** walnuts.

Choice A is incorrect. This is the number of containers that contain exactly **75** walnuts, not **78** walnuts.

Choice C is incorrect. This is the total number of containers of walnuts represented in the bar graph, not the number that contain exactly **78** walnuts.

Choice D is incorrect. This is the number of walnuts in a container that contains exactly **78** walnuts, not the number of containers that contain exactly **78** walnuts.
