Question

The histograms summarize the distributions of number of units sold, in thousands, for company A and company B. Which statement best compares the standard deviations of number of units sold for these companies?

- Answer**
- A. The standard deviation of number of units sold for company A is less than the standard deviation of number of units sold for company B.
 - B. The standard deviation of number of units sold for company A is greater than the standard deviation of number of units sold for company B.
 - C. The standard deviation of number of units sold for company A is equal to the standard deviation of number of units sold for company B.
 - D. There is not enough information to compare the standard deviations.
