Question

There are **350** objects in a box. Of these objects, **4%** are balls. How many balls are in the box?

Answer

- A. **4**
- B. **14**
- C. **70**
- D. **346**

Correct Answer: B

Rationale

Choice B is correct. It’s given that **4%** of the **350** objects in the box are balls. Therefore, the number of balls in the box can be found by calculating **4%** of **350**, which is equal to **$350\left(\frac{4}{100}\right)$** , or **14**.

Choice A is incorrect. This is the percentage of objects in the box that are balls, not the number of balls in the box.

Choice C is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect and may result from conceptual or calculation errors.
