Question

There are **320** marbles in a container. Of these marbles, **10%** are red. How many marbles in the container are red?

Answer

- A. **32**
- B. **288**
- C. **320**
- D. **352**

Correct Answer: A

Rationale

Choice A is correct. It's given that **10%** of the **320** marbles in a container are red. Therefore, the number of red marbles can be calculated by multiplying the number of marbles in the container by $\frac{10}{100}$, which gives **320** $\left(\frac{10}{100}\right)$, or **32**.

Choice B is incorrect. This is the number of marbles in the container that aren't red.

Choice C is incorrect. This is the total number of marbles in the container.

Choice D is incorrect and may result from conceptual or calculation errors.
