Question

There are **170** blocks in a container. Of these blocks, **10%** are green. How many blocks in the container are green?

Correct Answer: 17

Rationale

The correct answer is **17**. It's given that there are **170** blocks in a container, and of these blocks, **10%** are green. Since **10%** can be rewritten as $\frac{10}{100}$, or **0.1**, the number of green blocks in the container is **0.1(170)**, or **17**.
