Question

Out of **300** seeds that were planted, **80%** sprouted. How many of these seeds sprouted?

Correct Answer: 240

Rationale

The correct answer is **240**. It's given that **80%** of the **300** seeds sprouted. Therefore, the number of seeds that sprouted can be calculated by multiplying the number of seeds that were planted by $\frac{80}{100}$, which gives $300\left(\frac{80}{100}\right)$, or **240**.
