Question
432 is 96% of what number?

Correct Answer: 450

Rationale
The correct answer is 450. Let x represent the number that 432 is 96% of. This can be written as $(\frac{96}{100})x = 432$, or $0.96x = 432$. Dividing both sides of this equation by 0.96 yields $x = 450$. Therefore, 432 is 96% of 450.
