Question

Last year, Cedric had **35** plants in his garden. This year, the number of plants in Cedric’s garden is **60%** greater than the number of plants in his garden last year. How many plants does Cedric have in his garden this year?

Correct Answer: 56

Rationale

The correct answer is **56**. It’s given that Cedric had **35** plants in his garden last year and that the number of plants in Cedric's garden this year is **60%** greater than the number of plants in his garden last year. It follows that the number of plants in Cedric’s garden this year is **35** plus **60%** of **35**, which is equal to $35 + 35\left(\frac{60}{100}\right)$, or $35 + 35(0.6)$. This expression is equivalent to $35 + 21$, or **56**. Therefore, Cedric has **56** plants in his garden this year.
