Question

There are **450** tiles in a box. Of these tiles, **6%** are black. How many black tiles are in the box?

Correct Answer: 27

Rationale

The correct answer is **27**. It’s given that **6%** of the **450** tiles in a box are black. Therefore, the number of black tiles in the box can be calculated by multiplying the number of tiles in the box by $\frac{6}{100}$, which is equivalent to **450**($\frac{6}{100}$), or **27**.
