Question

The number w is 110% greater than the number z . The number z is 55% less than 50. What is the value of w ?

Correct Answer: 189/4, 47.25

Rationale

The correct answer is 47.25. It’s given that the number w is 110% greater than the number z . It follows that $w = \left(1 + \frac{110}{100}\right)z$, or $w = 2.1z$. It’s also given that the number z is 55% less than 50. It follows that $z = \left(1 - \frac{55}{100}\right)(50)$, or $z = 0.45(50)$, which yields $z = 22.5$. Substituting 22.5 for z in the equation $w = 2.1z$ yields $w = 2.1(22.5)$, which is equivalent to $w = 47.25$. Therefore, the value of w is 47.25. Note that 47.25 and 189/4 are examples of ways to enter a correct answer.
