Question

How many yards are equivalent to **77** rods? (**5.5 yards = 1 rod**)

Correct Answer: 423.5, 847/2

Rationale

The correct answer is **423.5**. It's given that **5.5 yards = 1 rod**. Therefore, **77** rods is equivalent to **(77 rods)** $\left(\frac{5.5 \text{ yards}}{1 \text{ rod}}\right)$, or **423.5** yards. Note that 423.5 and 847/2 are examples of ways to enter a correct answer.
