Question

The population density of Worthington is **290** people per square mile. Worthington has a population of **92,800** people. What is the area, in square miles, of Worthington?

Answer

- A. **102,400**
- B. **93,090**
- C. **320**
- D. **32**

Correct Answer: C

Rationale

Choice C is correct. It’s given that the population density of Worthington is **290** people per square mile and Worthington has a population of **92,800** people. Therefore, the area of Worthington is **92,800 people** $\left(\frac{1 \text{ square mile}}{290 \text{ people}}\right)$, which is equivalent to $\frac{92,800 \text{ square miles}}{290}$, or **320** square miles.

Choice A is incorrect and may result from conceptual or calculation errors.

Choice B is incorrect and may result from conceptual or calculation errors.

Choice D is incorrect and may result from conceptual or calculation errors.
