Question

What length, in centimeters, is equivalent to a length of **51** meters? (**1 meter = 100 centimeters**)

Answer

- A. 0.051
- B. 0.51
- C. 5,100
- D. 51,000

Correct Answer: C

Rationale

Choice C is correct. Since **1** meter is equal to **100** centimeters, **51** meters is equal to **51 meters**($\frac{100 \text{ centimeters}}{1 \text{ meter}}$), or **5,100** centimeters.

Choice A is incorrect and may result from conceptual or calculation errors.

Choice B is incorrect and may result from dividing, rather than multiplying, **51** by **100**.

Choice D is incorrect. This is the length, in millimeters rather than centimeters, that is equivalent to a length of **51** meters.
