Question

A cable provider wanted to know how many of its **30,000** customers would be interested in a new service plan. The provider selected **300** customers at random and asked each customer whether the customer would be interested in the new plan. Of those surveyed, **8** said they would be interested. Which of the following is the best estimate of the total number of customers who would be interested in the new service plan?

Answer

- A. 8
- B. 80
- C. 800
- D. 8,000
