Question

The ratio of t to u is 1 to 2, and $t = 10$. What is the value of u ?

Answer

- A. 2
- B. 5
- C. 10
- D. 20

Correct Answer: D

Rationale

Choice D is correct. It’s given that the ratio of t to u is 1 to 2. Since $t = 10$, it follows that the ratio of 10 to u is also 1 to 2. The relationship between these ratios can be represented by the proportion $\frac{10}{u} = \frac{1}{2}$. Multiplying both sides of this equation by 2 and then by u yields $20 = u$.

Choice A is incorrect. This is the value of u when $t = 1$. Choice B is incorrect. This would be the value of u if the ratio of t to u were 2 to 1. Choice C is incorrect. This is the value of t, not u.
