Question

A giant armadillo has a mass of **39** kilograms. What is the giant armadillo's mass in **grams**? (**1 kilogram = 1,000 grams**)

Correct Answer: 39000

Rationale

The correct answer is **39,000**. It's given that the giant armadillo has a mass of **39** kilograms. Since **1** kilogram is equal to **1,000** grams, **39** kilograms is equal to **39 kilograms** ($\frac{1,000 \text{ grams}}{1 \text{ kilogram}}$), or **39,000** grams. Therefore, the giant armadillo's mass, in grams, is **39,000**.
