Question

The ratio **140** to *m* is equivalent to the ratio **4** to **28**. What is the value of *m*?

Correct Answer: 980

Rationale

The correct answer is **980**. It's given that the ratio **140** to *m* is equivalent to the ratio **4** to **28**. Therefore, the value of *m* can be found by solving the equation $\frac{140}{m} = \frac{4}{28}$. Multiplying each side of this equation by *m* yields **140** = $\frac{4m}{28}$. Multiplying each side of this equation by **28** yields **3,920** = **4m**. Dividing each side of this equation by **4** yields **980** = *m*. Therefore, the value of *m* is **980**.
