Question

The line graph shows the probability of snow, as a percent, at a certain location for each day during a four-day period. According to the line graph, for which day during this four-day period is the probability of snow **30%**?

- Answer**
- A. Tuesday
 - B. Wednesday
 - C. Thursday
 - D. Friday

Correct Answer: C

Rationale

Choice C is correct. For the line graph shown, the probability of snow, as a percent, is represented on the vertical axis. According to the line graph, during this four-day period, the probability of snow is **30%** for Thursday.

Choice A is incorrect. The probability of snow on Tuesday is **60%**.

Choice B is incorrect. The probability of snow on Wednesday is **90%**.

Choice D is incorrect. The probability of snow on Friday is **70%**.
