Question

The scatterplot shows the relationship between two variables, x and y . A line of best fit for the data is also shown.

At $x = 25.5$, which of the following is closest to the y -value predicted by the line of best fit?

Answer

- A. 6.2
- B. 7.3
- C. 8.2
- D. 9.1

Correct Answer: C

Rationale

Choice C is correct. On the line of best fit, an x -value of 25.5 corresponds to a y -value between 8 and 8.5 . Therefore, at $x = 25.5$, 8.2 is closest to the y -value predicted by the line of best fit.

Choice A is incorrect and may result from conceptual errors.

Choice B is incorrect and may result from conceptual errors.

Choice D is incorrect and may result from conceptual errors.
