

Question ID: ab56a107

Question

Text 1

Digital art, the use of digital technology to create or display images, isn't really art at all. It doesn't require as much skill as creating physical art. "Painting" with a tablet and stylus is much easier than using paint and a brush: the technology is doing most of the work.

Text 2

The painting programs used to create digital art involve more than just pressing a few buttons. In addition to knowing the fundamentals of art, digital artists need to be familiar with sophisticated software. Many artists will start by drawing an image on paper before transforming the piece to a digital format, where they can apply a variety of colors and techniques that would otherwise require many different traditional tools.

Based on the texts, how would the author of Text 2 most likely respond to the claims of the author of Text 1?

Answer

- A. By arguing that a piece of art created digitally can still be displayed traditionally
- B. By explaining that it's actually much harder to use a tablet and stylus to create art than to use paint and a brush
- C. By insisting that digital art requires artistic abilities and skill even if it employs less traditional tools
- D. By admitting that most digital artists don't think fundamental drawing skills are important
