Question

While researching a topic, a student has taken the following notes:

- Georeferencing is the process of assigning geographic coordinates to an image.
- This process enables mapping software to place the image in its real-world location.
- A 2017 project by Tania López Marrero and colleagues georeferenced a set of aerial photographs of Puerto Rico’s coastline taken in 1930.
- These photographs are the earliest known aerial photographs of Puerto Rico.
- López Marrero’s project provided data that can help researchers analyze changes in Puerto Rico’s coastline.

The student wants to define the term “georeferencing.” Which choice most effectively uses relevant information from the notes to accomplish this goal?

Answer

- A. A 2017 project by Tania López Marrero and colleagues assigned geographic coordinates to photographs of Puerto Rico’s coastline and also used georeferencing.
- B. Tania López Marrero and colleagues used georeferencing in their analysis of the earliest known aerial photographs of Puerto Rico.
- C. Georeferenced aerial photographs from 1930 can help researchers analyze changes in Puerto Rico’s coastline.
- D. Georeferencing is the process of assigning geographic coordinates to an image so that mapping software can place it in its real-world location.

Correct Answer: D

Rationale

Choice D is the best answer. The sentence defines the term "georeferencing," stating that it is the process of assigning geographic coordinates to an image so that mapping software can place the image in its real-world location.

Choice A is incorrect. The sentence describes López Marrero’s team’s 2017 project; it doesn’t provide a definition of the term "georeferencing." Moreover, it misrepresents the information in the notes by characterizing the team’s assignment of geographic coordinates to photographs as a process distinct from georeferencing. Choice B is incorrect. The sentence states that López Marrero’s team used georeferencing, but it doesn’t provide a definition of the term. Choice C is incorrect. The sentence explains why a particular group of georeferenced aerial photographs is potentially useful for researchers; it doesn’t provide a definition of the term "georeferencing."
