Question

In a 2022 analysis of 200 terms, researchers found a broad pattern of valence-dependent mutation for which negative words saw a faster rate of cognate replacement—_____ the rate at which a word will be replaced over time with a noncognate form. Adjectives (e.g., “afraid”) saw the largest effect; nouns (e.g., “attack”), meanwhile, saw the smallest.

Which choice completes the text with the most logical transition?

Answer

- A. for example,
- B. likewise,
- C. in addition,
- D. that is,

Correct Answer: D

Rationale

Choice D is the best answer. "That is" logically signals that the information that follows in the sentence clarifies a term used in the previous discussion of the researchers’ findings: cognate replacement.

Choice A is incorrect because "for example" illogically signals that the information that follows in the sentence provides a specific example of the research findings described earlier. Instead, it clarifies a term introduced earlier in the sentence. Choice B is incorrect because "likewise" illogically signals that the information that follows in the sentence is similar to the previous information about the researchers’ findings. Instead, it clarifies a term introduced earlier in the sentence. Choice C is incorrect because "in addition" illogically signals that the information that follows in the sentence merely adds to the previous information about the researchers’ findings. Instead, it clarifies a term introduced earlier in the sentence.
