

Question

Urban agriculture is the practice of growing plant- or animal-based products in urban settings such as community gardens and rooftop farms. Esther Sanyé-Mengual, Kathrin Specht, and their team surveyed three groups of people in Bologna, Italy—leaders of urban agriculture projects, stakeholders in urban agriculture (e.g., food researchers and urban farming associations), and the general public—to compare their views about the extent to which urban agriculture contributes to 25 social or ecological services that the team identified. The survey results show that, on average, project leaders rated urban agriculture as contributing less to _____

Which choice most effectively uses data from the graph to complete the assertion?

- Answer**
- A. providing medicinal plants than to improving the local microclimate.
 - B. improving community members’ sense of attachment to the neighborhood than to offering educational opportunities.
 - C. improving the local microclimate than to providing medicinal plants.
 - D. improving the local microclimate than to providing tourist attractions.
