

Question ID: 72cbdbc6

Question

Researchers Eugeni Vidal-Tortosa and Robin Lovelace looked at the relationship between street lighting in a city and people's willingness to ride a bicycle. Their results suggest that poor street lighting can deter new or inexperienced cyclists from riding in a city but has little effect on experienced cyclists. Therefore, increasing the number of streetlights in a city could potentially _____

Which choice most logically completes the text?

Answer

- A. decrease the number of new or inexperienced cyclists riding in the city.
- B. increase the number of experienced cyclists riding in the city.
- C. decrease the number of experienced cyclists riding in the city.
- D. increase the number of new or inexperienced cyclists riding in the city.
