

Question ID: 82a76537

Question

Key-value pairs are an important aspect of JavaScript Object Notation (JSON), an electronic file format for storing and transmitting data. Keys function as labels, while values contain the actual information. In a JSON file storing data about fire belly _____ instance, you could encounter a key such as "species" with the associated value of "*Cynops orientalis*."

Which choice completes the text so that it conforms to the conventions of Standard English?

Answer

- A. newts. For
- B. newts, for
- C. newts: for
- D. newts; for
