Question

Supported by biochemical analyses of over 2,000 skeletons from the Middle Ages, _____

Which choice completes the text so that it conforms to the conventions of Standard English?

Answer

- A. vegetables and grains were, a 2022 study found, the primary components of early medieval rulers’ diets.
- B. early medieval rulers’ diets were found, in a 2022 study, to have primarily consisted of vegetables and grains.
- C. the primary components of early medieval rulers’ diets were vegetables and grains, according to a 2022 study.
- D. findings from a 2022 study suggested that vegetables and grains were the primary components of early medieval rulers’ diets.

Correct Answer: D

Rationale

Choice D is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "findings from a 2022 study" the subject of the sentence and places it immediately after the modifying phrase "supported...Ages." In doing so, this choice clearly establishes that the findings—and not another noun in the sentence—are supported by the biochemical analyses.

Choice A is incorrect because it results in a dangling modifier. The placement of "vegetables and grains" immediately after the modifying phrase illogically suggests that vegetables and grains are supported by biochemical analyses. Choice B is incorrect because it results in a dangling modifier. The placement of "early medieval rulers’ diets" immediately after the modifying phrase illogically suggests that the rulers’ diets are supported by biochemical analyses. Choice C is incorrect because it results in a dangling modifier. The placement of "the primary components" immediately after the modifying phrase illogically suggests that the primary components are supported by biochemical analyses.
