Question

$|x - 5| = 10$

What is one possible solution to the given equation?

Correct Answer: 15, -5

Rationale

The correct answer is **15** or **−5**. By the definition of absolute value, if $|x - 5| = 10$, then $x - 5 = 10$ or $x - 5 = -10$. Adding **5** to both sides of the first equation yields $x = 15$. Adding **5** to both sides of the second equation yields $x = -5$. Thus, the given equation has two possible solutions, **15** and **−5**. Note that 15 and -5 are examples of ways to enter a correct answer.
